

Blank Panel Module

Filler Plate for Structured Cabling Panels

MG-BLNK-A

Overview

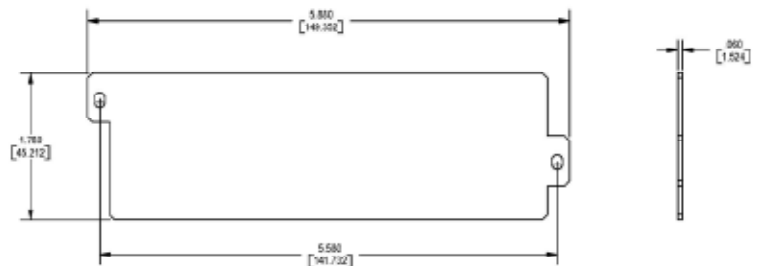

Whether for safety requirements or aesthetics, the Blank Panel Module fits in the standard space of any Telect Media Gateway module to provide a “clean” installation. Some installations require all the available mounting spaces either be occupied with service/termination modules or are covered with a Blank Panel Module. In these cases, this filler plate is simple to install.

Primary Benefits

- Prevents access to the rear of the panel
- Provides a finished look to the installation

Features

- Supports surface mounted and recessed mounted installations
- Maintains separation of terminations in the rear of the panel from the cross-connect functionality in the front
- Can be required to create an internal demarcation point for service providers
- Fits standard mounting spaces for all Telect Media Gateway enclosures
- Durable steel construction
